***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claims 1, 3 and 4 are linking

- I. Claims 2, 5-20 are drawn to an optical shifter, classified in class 349, subclass 202.
- II. Claims 21-23, drawn to a multi-color projector, classified in class 353, subclass 31.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination projector does not require a first optical shifting section parallel to that of the birefringent element as in claim 2. An alternative is these two are non-parallel (ie tilted or perpendicular). The combination also does not require the second position shifted by  $[\Delta d]$  and the third shifted by  $2*[\Delta d]$  as in claims 6, 7, and 8. An alternative to this is the second shifted by  $2*[\Delta d]$  and the second shifted by  $3*[\Delta d]$ . The combination also does not require the magnitude of shift caused by the first optical shifting section between the

optical axes of the twice than that of the second shifting section as in claim 5. The magnitude can be 3 times that of the second shifting section. The subcombination has separate utility such as a laser or scanning device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
